IMAC Forestry Cabs conform to W.C.B. Standards G602 and G603 for operator protection in Log Loader and Log Yarder applications.

Larger than OEM standard, these high strength cabs are fully upholstered with sound absorbing insulation. Tinted "Margard" windows eliminate the need for clumsy visibility obstructing screen guards.

Together these features make IMAC Forestry Cabs the **safest most comfortable cabs in the forest.**

More window area than our competition and 3" wider - the Best!

Options:
