

CUT SLOPES UP TO 45° LEFT OR RIGHT

PowerTwist Bucket

PowerTwist Blade

Shown with Quick Coupler Lugging
Also available as Pin-on and without Tilt

IMAC PowerTwist products for excavators are designed for use where cross sloped is desired in the final excavation. Applications include cleaning irrigation ditches, landscaping mountain sides, creating drainage. Choose between Buckets for loose materials that flow or blades for sticky or binding materials.

Features:

- **45 degree Power Tilt** to left or right allows operator to easily adjust for slope requirements.
- **Hardened Pins and Bushings** in all joints for longer wear.
- **Heavy Duty Cylinders** are located for power and protection.
- **Dual Cross Over Relief Valve** mounted on bucket to reduce chance of cylinder damage.
- **Compact Design** to maintain optimum tip radius allowing for maximum breakout force.
- **Open Profile** to facilitate material flow.
- **Lateral Skid Bars** for maximum strength, wear resistance and ease of replacement.
- **Widths** down to 60" for most excavators.

Options:

- Bolt on **cutting edge**.
- Bolt on **side cutters**.
- **Quick Coupler** mounting.
- **Hydraulic Kit** for hookup to machine.
