

- **STRAIGHT** • **MANUAL ANGLE** • **HYDRAULIC ANGLE** •

WHEEL LOADER

- **Pin on to Standard Loader Arms**
- **Quick Coupler Mounted**

MOTOR GRADER

- **Quick Coupler to Parallel Lift Group**
- **Built in Parallel and Radial Lift Groups**

Hydraulic and Manual Angle Dozers

Angle 25 degrees to the right or left.

Hydraulic Angle Dozers

Consist of moldboard, A-frame, two reversing cylinders.

Cab controlled quick reversing action.

Infinite adjustments between right and left limits.

Ideal for work on mountain roads, airports, parking lots, plant facilities, rural and urban roads.

Manual Angle Dozers

Consist of moldboard, mounting frame and a moveable brace which inserts for angling left or right and folds flat for straight work.

Used in applications similar to Hydraulic Angle Dozers but where fewer adjustments are required.

Vee-Plows

8'8", 9'9", 10'6" and 12'0" cleared widths

Moldboard Sizes

To suit every machine size and application.

Quick Coupler Advantage

Quick Coupler mounted blades **can be interchanged between Wheel Loaders and Motor Graders**

Quick Coupler facilitate using a variety of attachments on each machine or using the same attachment on a variety of machines.

Options

Specialized moldboards available for work in dirt or snow removal.

Adjustable Skid Shoes available for snow removal blades.

Straight Cutting Edges with Corner Bit options available.
