

U-Blades

CAT D9R D10R D11R

A *CLW* Company

www.imac.ca

Sized for Productivity - Built to Last

Configured For Any Application

- Rock
- Reclamation
- Coal Seam
- Sulphur
- Coal Stockpile

Blade sizes are customized to individual applications taking into account material characteristics and up or down and amount of incline during dozing.

- Compatible with OEM push groups
- IMAC push groups available
- Optional Wear Packages -

Typical Reclamation Blade Specifications:

Machine	Capacity Yds ³	Width In.	Height In.	Weight Lbs
D9R	28.3	204"	83"	11000
D10R	40.0	228"	97"	17000
D11R	60.0	276"	103"	19700

Specifications for other blades available on request.

Rock - similar in size to OEM blades and featuring extreme service wear protection options.

Reclamation - generally larger than standard U-Blades, designed for downhill slot dozing of disturbed materials. Also available with extreme service wear protection options.

Coal Seam - smaller capacity and narrower, with added materials on corners for strength and wear protection.

Coal Stockpile and Sulphur - large capacity and lightweight construction for re-handling coal
